

DIAGRAM 1: PRODUCT SYSTEM OVERVIEW

Pricing Intelligence Operating System – Simple, Powerful, Free

High-level architecture showing how all modules, engines, and data connect to deliver intelligent pricing, estimation, and proposal audit capabilities.

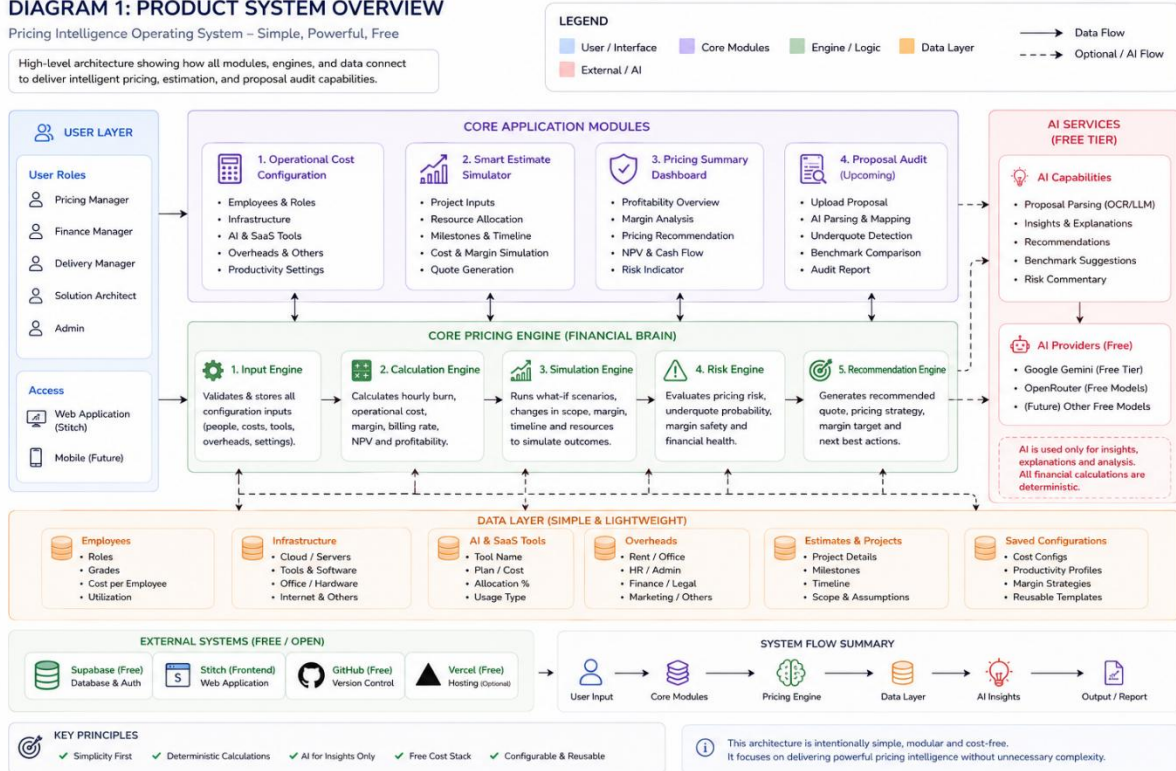

DIAGRAM 2: CORE PRICING ENGINE FLOW

From Inputs to Recommended Quote

This flow shows how the Core Pricing Engine converts user inputs and configurations into a recommended quote with margin safety, risk evaluation and financial insights.

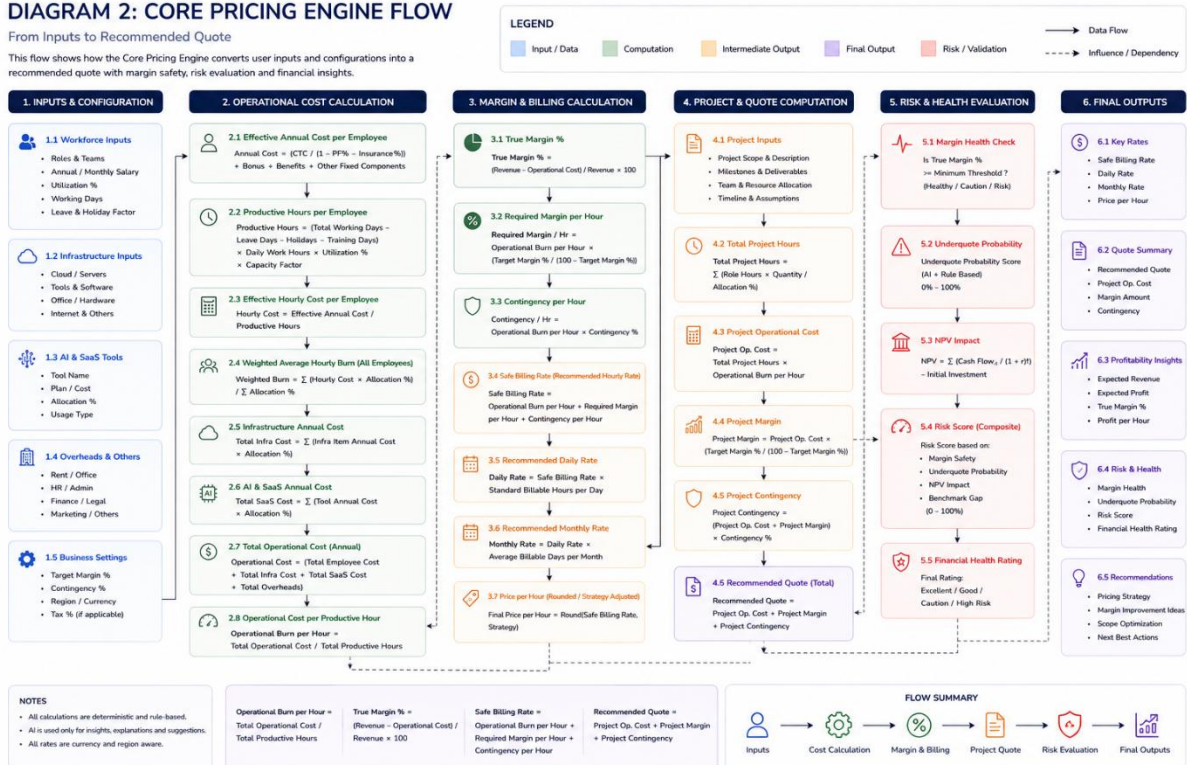

DIAGRAM 3: DATABASE RELATIONSHIP (ERD)

Simple & Lightweight Data Model for Pricing Intelligence Operating System

This ERD shows core entities and relationships needed for configuration, estimation, pricing simulation, and proposal audit.

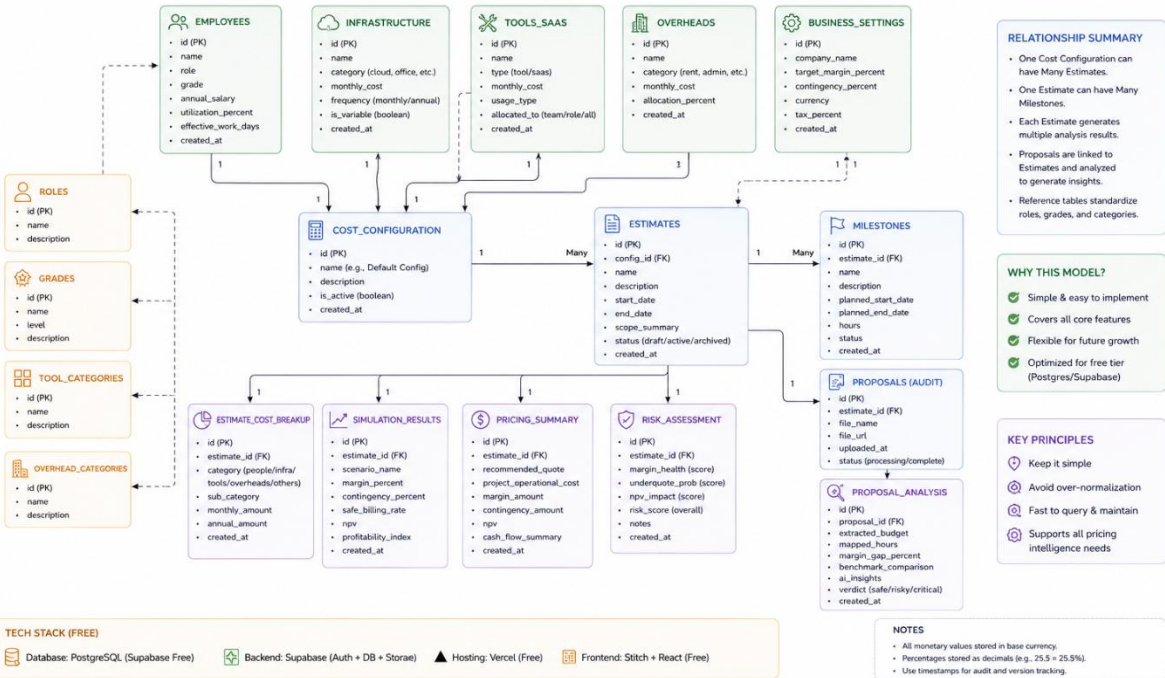

DIAGRAM 4: USER FLOW (SIMPLE & LINEAR)

End-to-End User Journey in the Pricing Intelligence Tool

This flow shows the primary user journey for creating a pricing estimate and analyzing profitability. All secondary actions are optional.

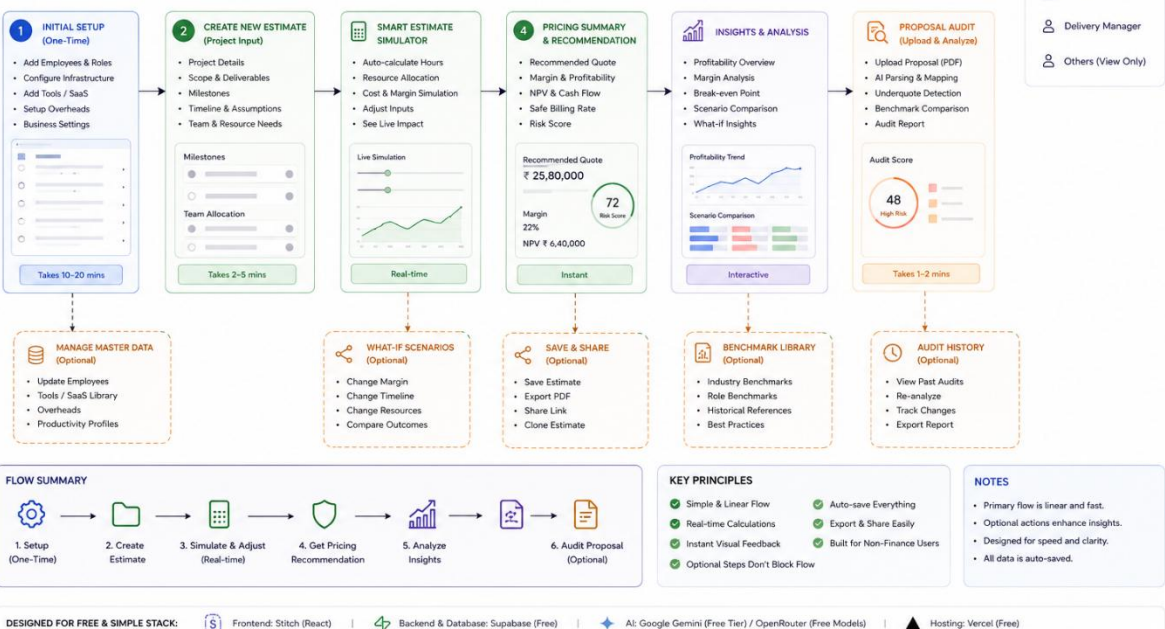

DIAGRAM 5: PROPOSAL AUDIT FLOW

AI-Powered Proposal Analysis & Audit

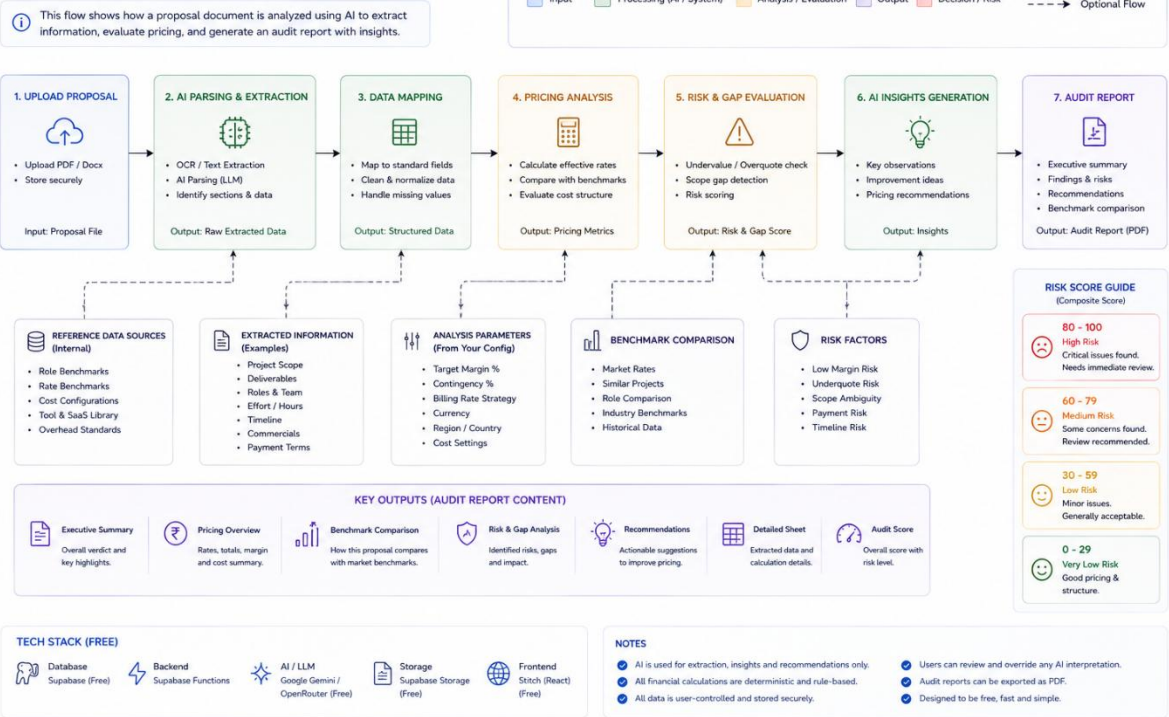

DIAGRAM 6: DEPLOYMENT ARCHITECTURE

Free, Simple & Scalable Architecture
